

Which bunny will your family enjoy on Easter day...

...and which bunny needs your love and care for the next 10 years?

Bringing a live rabbit home for Easter should be a well-planned, educated decision. Domestic rabbits live as long as dogs and cats. They need specialized veterinary care, healthy food, time to exercise and play, and a responsible caretaker.

This Easter, make the right choice.

Don't bring home a bunny that will be neglected or discarded.
